

Dear Holy Cross Parent/Coach,

St. Elizabeth Sports Medicine Center is excited to offer ImPACT™ baseline neuropsychological testing as a **free** service to our athletes. In the event that an athlete should sustain a concussion, the baseline test can be compared to post injury test results and greatly assist in proper management of the concussion.

The ImPACT™ baseline testing will be offered for **free** at Holy Cross High School on Tuesday, May 30th, Thursday, June 1st, and Friday, June 2nd. Baseline tests will be scheduled hourly and take approximately 45 minutes to complete. Testing times for all days will be 12pm, 1pm, 2pm, and 3pm. Testing will take place in computer lab 1. **Please e-mail me directly at Tyler.Watson@stelizabeth.com to schedule appointments.** For those athletes who are not able to make the test dates, tests are also offered year round at our St. Elizabeth Sports Medicine Offices for a fee of \$25. **Baseline ImPACT™ tests are good for 2 years, so if an athlete took the test last year, they do not have to take it again this year.**

Thank You,

Tyler Watson, ATC, NREMT
